Contents

Preface to the Second Edition.....	xv
Preface to the First Edition.....	xvii
About the Authors	xix
Author Contact Information.....	xxi

Section 1 Fundamentals

Chapter 1 Toward Better Design for Older Adults	3
1.1 Demographics.....	3
1.2 What Products Do Older Adults Use?	5
1.3 Is Good Design Worth the Effort?.....	7
1.4 How Do We Define “Older Adult”?	8
1.5 Toward Better Design	9
1.6 General Guidelines, Specific Questions	9
1.7 Overview of the Book.....	10
Recommended Reading	12
 Chapter 2 Characteristics of Older Adult Users	 13
2.1 What Are the Underpinnings of Human Factors?	13
2.2 What Human Characteristics Should Be Considered?	14
2.3 Aging and the Sensory Modalities	15
2.3.1 Taste and Smell	15
2.3.2 Haptics	16
2.3.3 Audition	17
2.3.4 Vision.....	17
2.4 Cognition.....	18
2.4.1 Memory	20
2.4.2 Attention	22
2.4.3 Spatial Cognition	23
2.4.4 Understanding Written and Spoken Language	23
2.5 Control of Movements and Movement Speed.....	24
2.6 Summary of Review	24
2.7 Guidance for Design.....	26
Recommended Reading.....	27

Chapter 3 Guiding the Design Process	29
3.1 Principles of Design	29
3.2 Universal Design	30
3.3 What Makes a Product Usable?	31
3.4 Measuring Usability Components	32
3.5 User-Centered Design (UCD)	33
3.5.1 Task Analysis	33
3.5.2 Usability Testing	35
3.5.2.1 Two Perspectives to Usability Testing	35
3.5.2.2 Usability Test Plan	36
3.5.2.3 Think-Aloud Verbal Protocols	37
3.5.2.4 Equipment	38
3.5.2.5 Participants	38
3.5.2.6 Pilot Testing and Training	39
3.5.3 Field Observations	40
3.5.4 Interviews	41
3.5.5 Questionnaires	41
3.5.6 Focus Groups	42
3.6 Design Methods That Do Not Involve the User	42
3.6.1 Checklists and Guidelines	43
3.6.2 Heuristic Evaluation	43
3.6.3 Layout Analysis	43
3.7 The Product Design Lifecycle	44
3.8 Conclusion	45
Recommended Reading	45

Section 2 Design Guidelines

Chapter 4 Improving Perception of Information	49
4.1 Visual Perception	49
4.1.1 Text Characteristics	51
4.1.2 Icons versus Text	51
4.1.3 Additional Factors to Consider	52
4.2 Guidelines for Visual Presentation of Information	52
4.2.1 General Lighting Guidelines	52
4.2.2 Text	53
4.2.3 Use of Three-Dimensional Displays	54
4.3 Issues in Aging and Auditory Perception	54
4.3.1 Thresholds for Sounds	55
4.3.2 Speech Perception	55
4.3.3 Localization	56
4.4 Guidelines for Auditory Presentation of Information	57
4.4.1 Sound	57
4.4.2 Speech	57

4.5	Issues in Haptics.....	58
4.5.1	Overview of Haptics	58
4.5.2	Vibration Perception.....	58
4.6	Guidelines for Haptic Presentation of Information	59
4.7	Using These Guidelines for Optimizing Perception of Information.....	59
	Recommended Reading	60
Chapter 5	Design of Input and Output Devices.....	61
5.1	Issues in Aging and the Design of Input Devices	62
5.1.1	Minimizing Steps	62
5.1.2	Consistency.....	64
5.2	Types of Input Devices	65
5.3	Guidelines for the Design of Input Devices	68
5.4	Issues in Aging and the Design of Output Devices	70
5.5	Guidelines for the Design of Output Devices	70
5.6	Using These Guidelines for Effective Design of Input and Output Devices.....	71
	Recommended Reading	72
Chapter 6	Interface Design	73
6.1	Interface Design Issues.....	73
6.2	Issues in Aging and Interface Design.....	75
6.2.1	Do Older Adults Use Computer Technologies?	75
6.2.2	Multiple Levels of User Abilities	77
6.2.3	User Goals and Expectations	77
6.2.4	Information Organization.....	78
6.2.5	Getting Lost in the System and Navigation Tools	80
6.2.6	Depth versus Breadth.....	80
6.2.7	Compatibility	82
6.2.8	Documentation and Error Recovery	83
6.3	Guidelines for Effective Interface Design.....	85
6.3.1	Physical Characteristics	85
6.3.2	Navigation	86
6.3.3	Information Organization.....	86
6.3.4	Conceptual.....	86
6.4	Using These Guidelines to Facilitate Proper Interface Design	87
	Recommended Reading	88
Chapter 7	Design of Training and Instructional Programs.....	89
7.1	Principles of Instruction	90
7.2	An Integrated Approach to Instructional Design for Complex Tasks	92

7.3	Human Cognitive Limitations and the Design of Instructional Programs	93
7.3.1	Learning Tasks	94
7.3.2	Supportive Information	96
7.3.3	Procedural Information	96
7.3.4	Part-Task Practice.....	97
7.4	Illustration of Design Principles and Strategies	98
7.5	Pacing.....	99
7.6	Organization of the Training Material	100
7.7	Consistency of Information	100
7.8	Temporal Spacing Considerations.....	101
7.9	Adaptive Training	102
7.10	Feedback.....	102
7.11	The Use of Simulation in Training	103
7.12	E-Learning.....	104
7.13	Performance Assessment	105
7.14	Guidelines for the Design of Training and Instructional Programs	106
7.14.1	Train Using Sets of Holistic Practice Tasks.....	106
7.14.2	Provide Supportive Information	107
7.14.3	Training Procedural Information.....	107
7.14.4	Promoting Deeper Learning	108
7.14.5	Environmental Considerations.....	108
7.14.6	Learning Materials.....	108
7.14.7	Reducing Training Demands	109
7.15	Conclusion	109
	Recommended Reading	109

Section 3 Exemplar Applications

Chapter 8	Making the Work Environment Age-Friendly	113
8.1	The Workplace of the 21st Century	115
8.1.1	Technology in the Workplace.....	115
8.1.2	Changes in Work Arrangements	116
8.2	What We Know about Older Workers: Myths and Realities	117
8.2.1	Adaptation to Changes in Jobs	117
8.2.2	Older Workers and Productivity	118
8.3	The Potential Implications of Aging for Work.....	119
8.3.1	Sensory and Perceptual Changes	119
8.3.2	Psychomotor Skills, Strength, and Endurance	120
8.3.3	Cognition and Learning.....	121
8.4	Conclusion	122
	Recommended Reading	123

Chapter 9 Maximizing the Usefulness and Usability of Healthcare Technologies	125
9.1 What Makes Healthcare Technologies Unique?	127
9.2 Movement Control, Perception, Cognition, and Interface Design.....	128
9.3 Training Issues.....	132
9.4 Maintenance, Calibration, and Updating of the Technology.....	133
9.4.1 Maintenance	134
9.4.2 Calibration	134
9.4.3 Updating	135
9.5 Safety Issues	135
9.5.1 Hazard Awareness.....	135
9.5.2 Warnings	136
9.6 Credibility	136
9.6.1 The Internet	137
9.6.2 Medical Devices	137
9.7 Conclusion	138
Recommended Reading	139
Chapter 10 Transportation	141
10.1 Driving.....	141
10.1.1 Driver Training and Screening.....	142
10.1.2 Advanced Technology Systems	145
10.1.3 Redesign of Roadway and Signage Systems	145
10.2 Pedestrian Behavior.....	146
10.3 Wayfinding in Built Environments.....	147
10.3.1 Spatial Organization.....	148
10.3.2 Landmarks, Signage, and Directories.....	149
10.3.3 Maps	150
10.4 Negotiating Public Transportation Environments	151
10.4.1 Wayfinding	151
10.4.2 Arrival at the Airport	152
10.4.3 Boarding Pass Dispensing Devices	152
10.4.4 Traveling to the Gate	153
10.4.5 Security Area and Embarking/Disembarking Planes.....	153
10.5 Conclusion	154
Recommended Reading	155
Chapter 11 Designing Accommodations for Aging-in-Place	157
11.1 Where and How Older Adults Live	157
11.2 Evaluating the Home.....	159
11.2.1 Falls	159
11.2.2 Structural Modifications	160
11.2.3 Lighting	161
11.2.4 Products for Independent Living	162

11.3	Advanced Technology Development	163
11.3.1	Memory Supports	163
11.3.2	Home Monitoring Systems	163
11.3.3	Social Support	164
11.3.4	Technology Acceptance and Privacy Issues	164
11.3.5	Acceptance Decision Tree	165
11.4	Conclusion	166
	Recommended Reading	167

Section 4 Tutorials

Chapter 12	Involving Older Adults in Research and Usability Studies.....	171
12.1	Inclusion of Representative Samples.....	171
12.2	Selection Criteria	172
12.3	Participant Recruitment	173
12.4	Study Protocols.....	174
12.5	Measurement Instruments.....	176
12.6	Guidelines for Including Older Adults in Research and Usability Studies.....	177
	Recommended Reading	177

Chapter 13	Conducting Focus Groups with Older Adults	179
13.1	Developing the Script.....	179
13.1.1	Introduction and Icebreaker Question.....	180
13.1.2	Developing the Questions	181
13.2	Preparing for the Interviews.....	183
13.2.1	Training the Moderator(s)	184
13.2.2	Developing Ancillary Materials.....	184
13.2.3	Selecting the Interview Environment	185
13.3	Collecting the Data.....	185
13.3.1	Choosing the Participants.....	185
13.3.2	Conducting the Interview	186
13.4	Data Analysis.....	187
13.4.1	Segmenting and Coding the Data	187
13.4.2	Interpreting the Data.....	190
13.5	Guidelines for Effective Focus Group Research	190
13.5.1	Developing the Script.....	190
13.5.2	Conducting the Focus Group Session.....	191
13.5.3	Analyzing and Interpreting the Data.....	191
	Recommended Reading	191
	Focus Group Research in General	191
	Focus Group Studies with Older Adults	191

Chapter 14 Statistical Considerations in Usability Testing	193
14.1 Precise Measurement Studies	193
14.2 Problem Discovery Studies.....	196
14.3 Summary	199
14.4 Guidelines for Determining Sample Sizes for Usability Test Studies	200
Recommended Reading	201
Chapter 15 Task Analysis and Error Prediction	203
15.1 Task Analysis	203
15.2 Human Failure Modes and Effects Analysis (HFMEA)	205
15.3 Example: Self-Checkout Systems.....	206
15.4 Generating the HFMEA for the Example	209
15.5 Summary	214
15.6 Guidelines for Task Analysis and Error Prediction.....	215
Recommended Reading	215
Chapter 16 GOMS Modeling for Older Adults	217
16.1 Reducing Data Entry Burden for a Software Authentication Process.....	219
16.1.1 Assumptions about Task Processes	221
16.1.2 Modeling Task Performance at the Operator Level.....	221
16.1.3 Error Analysis.....	223
16.1.4 Error Correction Cost.....	224
16.2 Trade-Offs in Design.....	227
16.3 Conclusion	228
16.4 Guidelines for GOMS Modeling for Older Adults.....	228
Recommended Reading	228
Chapter 17 Multimedia Design.....	229
17.1 Does Media Matter?	229
17.2 The Role of Cognition in Multimedia Learning Systems.....	231
17.3 Ten Guidelines for Designing Multimedia Instructional Programs.....	232
17.4 A Software Application Example.....	237
17.5 Conclusion	238
Recommended Reading	238
Section 5 Conclusion	
Chapter 18 Synthesis and Comments	241
18.1 Themes.....	241
18.1.1 Older Adults Do Use New Technologies	241

18.1.2	Past Experience (or Lack Thereof)	
	Influences Performance	241
18.1.3	If It Cannot Be Seen, Heard, or Manipulated,	
	It Cannot Be Used	242
18.1.4	Age-Related Declines in Cognition Influence	
	Performance.....	242
18.1.5	Environmental Support/Knowledge	
	in the World/ Affordances	243
18.1.6	Preferences Do Not Necessarily	
	Map to Performance.....	243
18.1.7	Training, Documentation, and User Help Are	
	Necessary (and Should Be Well Designed).....	243
18.1.8	User Testing Is Crucial for Successful Design	244
18.1.9	Good Design for Older Adults	
	Is Generally Good Design for Everyone.....	244
18.1.10	Attitudes Matter.....	244
18.2	Development of Future Technology	245
18.2.1	New Is Always New.....	245
18.2.2	New and Improved Is Not Necessarily Better	245
18.3	Conclusion	246
	Recommended Reading	248
	References	249
	Author Index	257
	Subject Index	261
